Skills

- Python
- C/C++
- Java
- R
- Git
- SQL
- Linux/Bash
- Stochastic Processes
- Pandas
- Scikit-Learn
- Seaborn
- Numpy
- Statistics
- Machine Learning
- Linear Algebra
- Reinforcement Learning

Languages

Polish - Native
English - C1
German - B1

Norbert Frydrysiak

Data Science Student

I approach my studies with unwavering ambition and deep passion. From an early age, I have been captivated by the exact sciences, with mathematics holding a special place in my heart. I am also deeply interested in the GNU/Linux family of operating systems and cutting-edge technologies. In my spare time, I keep up with the world of football, explore computer games, and delve into the realm of investing.

Education

- **2022-10 - present (expected 2026-02)**
  Data Science, Bachelor of Science in Engineering
  Faculty of Mathematics and Information Science, Warsaw University of Technology
- **2018-09 - 2021-05**
  "Matex" - Curriculum with academic level mathematics and physics
  Stanisław Staszic High School, Warsaw

Experience

- **2023-10 - present** **Data Science Student Club**
  Member
- **2024-07 - 2024-09** **Generali TU SA**
  Data Science Intern in the Property and Personal Insurance Tariff Team - Developing GLMs for predicting travel insurance claims, analyzing data, and visualizing results.

Certificates

- **2024-05**
  Introduction to Natural Language Processing - DataCamp
- **2024-05**
  Unsupervised Learning in Python - DataCamp

Projects

- **Credit Score Classification** - The goal of the project is to predict based on data whether a given person will repay the loan.
- **Linux Me Project** - Analyzing Linux system data using R and Shinydashboard for insightful insights.
- **Brand Laptops Clustering** - Comparing and Evaluating Clustering Algorithms on a Laptop Dataset.
- **Hyperparameter Tunability AutoML** - The goal of this project is to analyze the tunability of hyperparameters of three selected machine learning algorithms (e.g., XGBoost, Random Forest, Elastic Net) on at least four datasets.
